Fujikura Electronic Components (Thailand) Ltd.

TSUNAGU TECHNOLOGY

Corporate Information

Company name

Fujikura Electronic Components (Thailand) Ltd.

President & CEO

Mr.Takaharu Serizawa

Establishment

1 October 2021

Capital

3,068 Million Baht

Shareholders

Fujikura Ltd. 100%

Headquarters

323 United Center Building,
28th Floor Silom Rd, Silom, Bangrak,
Bangkok 10500 Tel: 02-2311965

Mission

To create exceptional value for our customers around the world using **“Tsunagu” technologies.**

We dedicate ourselves to providing exceptional products and solutions earning our customers' trust and contributing to society.

Vision

“All employees working livelyly”
and
“To achieve the world number 1 competitive manufacturer of Electronic Components”

Core Values

 Customer Satisfaction	 Collaboration	 Change
ความพึงพอใจของลูกค้า คุณคิดว่าลูกค้าพึงพอใจแล้วหรือยัง? “Are the customers satisfied?”	การประสานความร่วมมือ คุณให้ความร่วมมือกับผู้อื่นแล้วหรือยัง? “Do you collaborate with others to fully realize capabilities and potential?”	ยอมรับการเปลี่ยนแปลง คุณพร้อมที่จะรับการท้าทายกับการเปลี่ยนแปลงแล้วหรือยัง? “Are you willing to take up challenges with enthusiasm to drive progress?”

“Tsunagu” in Japanese word mean “connecting”.

Membrane Switch

We are leading manufacturing of electronics circuit base from PET or PEN by printing technique.

1. Base film is Polyethylene Terephthalate (PET) / Polyethylene Naphthalate (PEN)

2. Screen printing technology

Screen Printing Technology is applied to build circuit with multi-layers on base film.

3. Flexibility & Thin

Various circuit can be fabricated on the flexible and pliable which can assemble on curved surface.

4. Wide applicability

Applicable to various device by using ink, mount component on film or by combining the film with various switches and sensors.

PC & Accessory

Automobiles

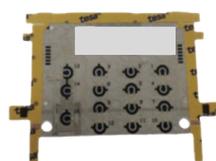

Touch key switch

Occupant passenger detection sensor

Digital

Security switch

Fine pitch connector

- Stationary
- Portable

Hard Disc Drives

We produce and assemble Coils and Combs which are component Parts of Laptop 2.5" and PCs 3.5" Hard Disk Drive.

Features

- Coil Design Optimization
- Machining Actuator and Design review
- Resonance Analysis (Finite element method and Modal Analysis)
- Surface Treatment Development (Electro less Ni Plating)
- Automation Manufacturing Assembly
- LAB Cleanliness Test and Reliability Test
- Cleanroom Class 100 and Class 1000

Actuator assembly for 2.5" and 3.5" HDD

Winding machine

CNC machine

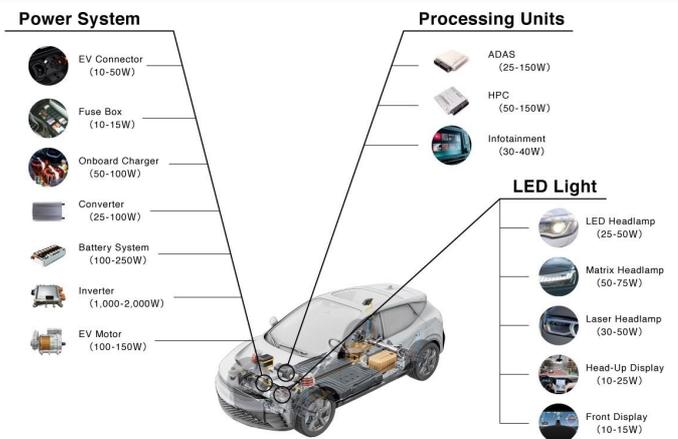

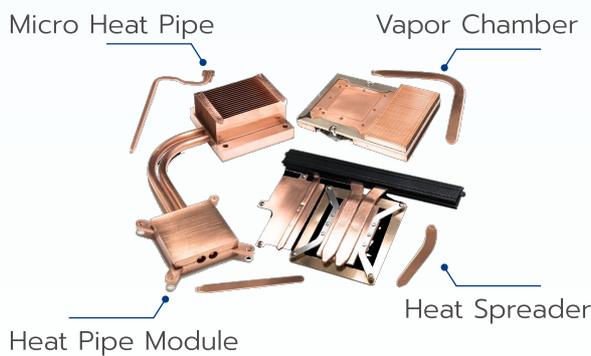

Coil for 2.5" and 3.5" HDD

Comb for 2.5" and 3.5" HDD

Thermal Solutions

Thermal Solutions :

Fujikura is one of the biggest suppliers of thermal solutions in the world. Our core products, including heat pipes, vapor chambers and loop heat pipes, are excellent two phase heat transfer devices. We develop and offer the best thermal solutions that meet customer requirements.

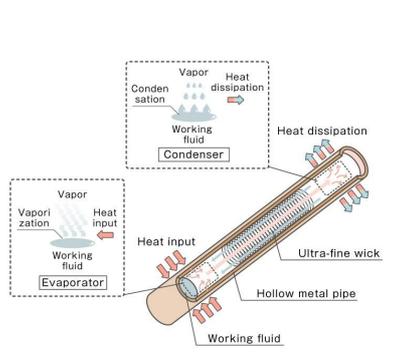

Thermal Solutions for EV

Core Technology : Heat Pipe, Vapor Chamber and Solution for IGBT Cooling

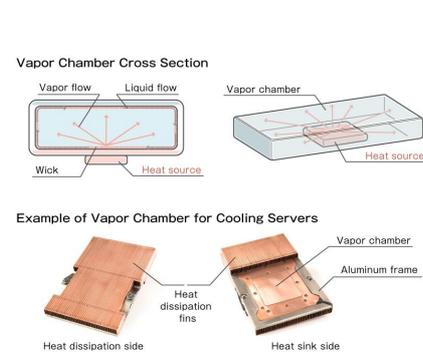

We offer the best choice of thermal solutions such as heat sinks with heat pipes and vapor chambers to meet the requirement for a variety of IGBT applications.

IGBT Cooling

Heat Pipe

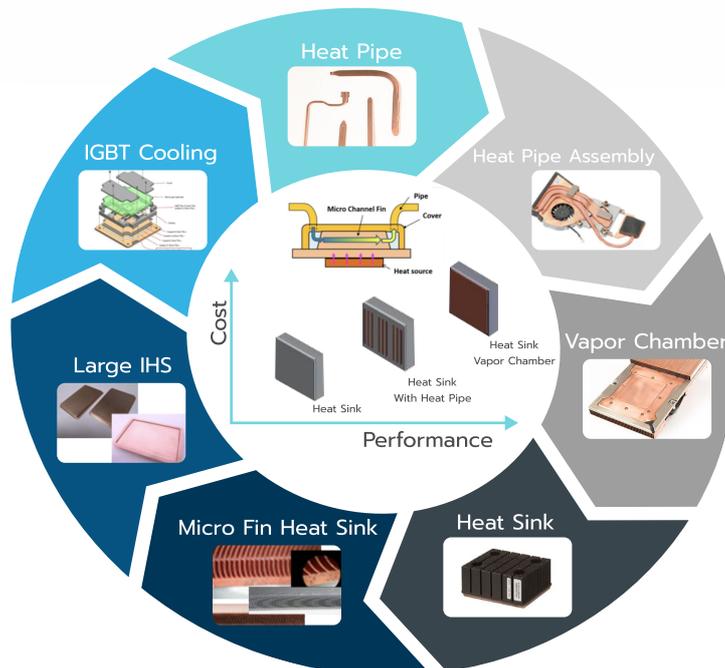

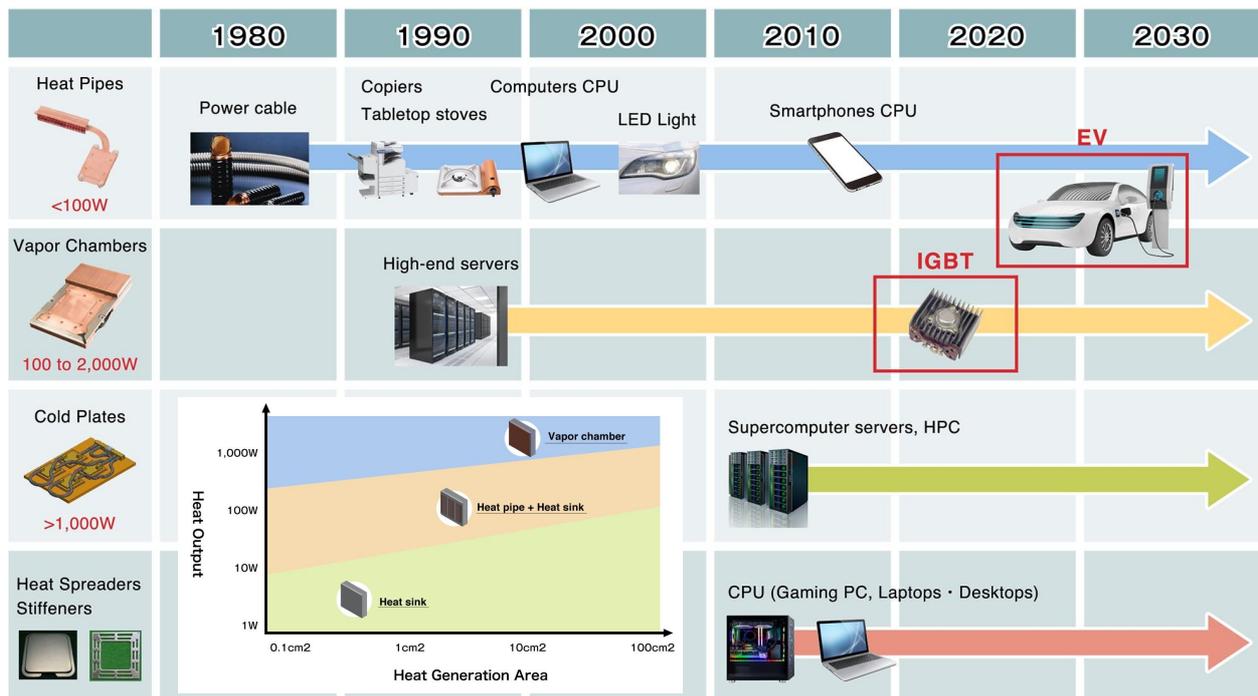

Vapor Chamber

Thermal Solutions

Product line-up :

Thermal solution product are applied whole industrial field. We can prepare thermal solution for customer request. Over 250 million pieces Micro-Heat pipes and Vapor Chambers provided to our global customers.

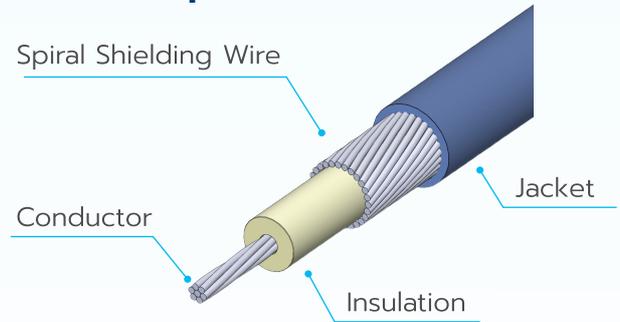

Electronic Component

Micro coaxial cable assembly

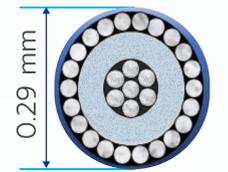

Specifications

MCX Cable Structure

Key features

- Excellence electrical performance
- Small diameter expands design possibilities
- EMC/EMI Protection with high-speed data transmission
- Highly flexible applications

Cross Section

Application

Mobile devices

Laptop

DSLR/DSC

MCX is used in various Electronics fields all over the world.

Security camera

Drone

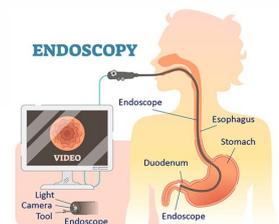

HDM

Medical devices

Endoscope

Hearing Aids

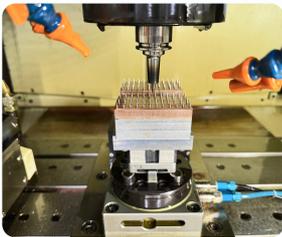

- ✓ Cleanroom control
- ✓ RoHs compliant products

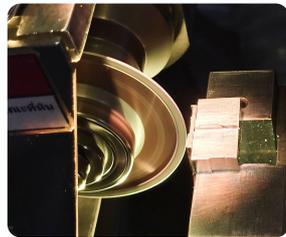

Dies & Tooling

We are a leading die manufacturer specializing in producing blanking dies, molding dies, and high precision parts with high technology of CNC machines, CMM, and Smart scope measuring machines to control 2 microns accuracy.

Key of process

Machining

Profile grinding

Wire cut

EDM

Key of measuring machine

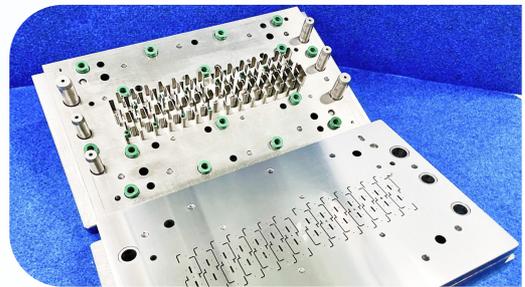

CMM

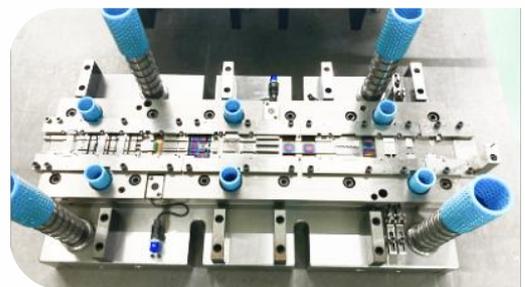

Smart scope (OGP)

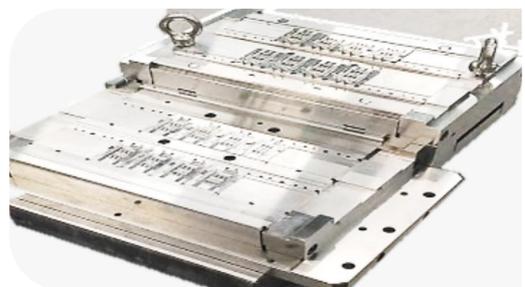

Products highlight

Blanking die

Progressive die

Molding die

Fujikura Group Environment Long-Term **Vision 2050**

Challenge 1

Zero CO2 emissions at plant
by 2050
Climate change

Challenge 2

Minimize use of water
at plants and wastewater
management

Challenge 3

Symbiosis between plant
workers and nature

Challenge 4

Effective use of resources
and resource cycle
